

ASPEN  
GREEN  
PURE SCIENCE

Too many companies are not being transparent about what is inside their products and making false claims for advertising and sales. Aspen Green is committed to providing the purest hemp to our consumers and maintaining our 3 core pillars: **QUALITY, INTEGRITY, and TRANSPARENCY.**

## COMPANY OVERVIEW

Aspen Green is a whole hemp CBD company based in Colorado—the premier location for growing the finest hemp, due to its climate and topography. All of our products are derived from **Full Spectrum Hemp Extract**. We don't remove any of the beneficial cannabinoids. We leave them all in so our customers can receive the full benefit of the hemp plant.

Our products are tested via third-party laboratories to ensure the phytocannabinoid counts are accurate. Consumers can be confident that the product in the package is the product on the package via a QR code on each and every product label and box.
